

Pharmaceutical import and export companies allowed to distribute COVID-19 vaccines

ក្រុមហ៊ុនមេធាវី អេចប៊ីអេស

Pursuant to Letter No. 3894 issued by the Ministry of Health (the "MOH") on 27 July 2021, in order to reduce the spread of COVID-19, the MOH is now allowing pharmaceutical import and export companies to register and import World Health Organization-recognized COVID-19 vaccines for distribution to legal private health care providers throughout Cambodia, provided that they comply with applicable standards for transporting and storing vaccines in warehouses to ensure high safety and efficacy.

Interested pharmaceutical importers must prepare the application documents according to the procedures specified by the MOH.
